KUM
Faded

KUM Faded – When Compromise is not an Option!

KUM Faded - 100% Handcrafted to Perfection in Germany to offer artists a tool that is second to none.

Made with a blend of two different high-tech synthetic fibres!

The softer of the two fibres consists of an ideal blend of different fibre diameters . This guarantees the extremely high water- and colour absorption capacity + an even pay-off of medium.

The stiffer fibres undergo a special tempering process to provide the necessary stability and as a consequence offer more elasticity and control while working with the brush.

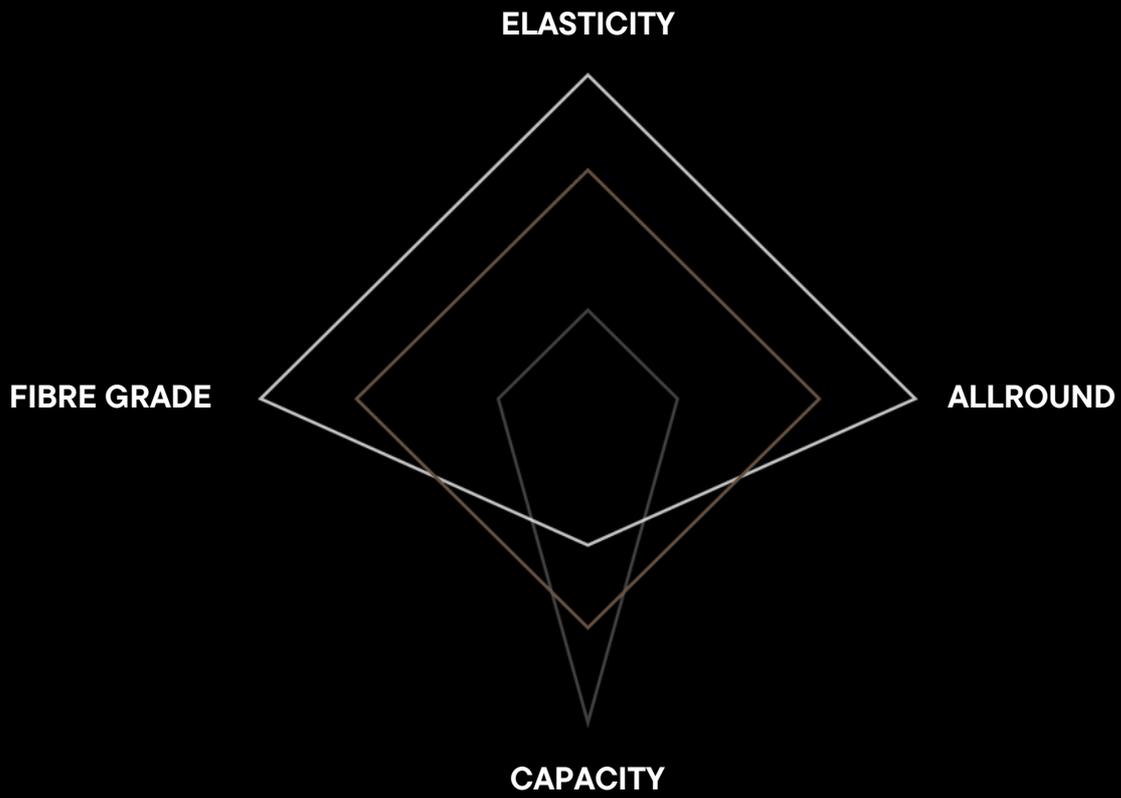

The matt black handle give this brush an elegant, minimalist and timeless design.

The KUM Faded Brushes are MUST-HAVE for every watercolouring artist!

FACTS

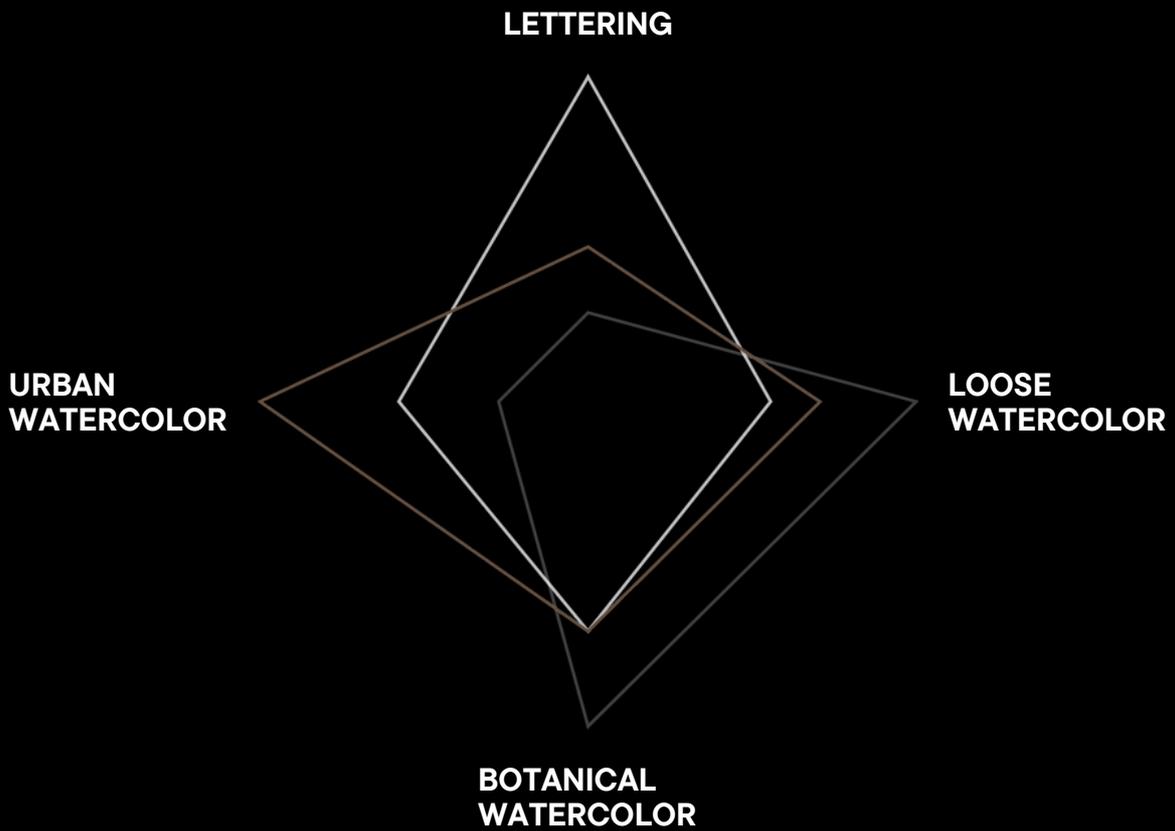

- » Fibre grade: medium-soft
- » High-tech synthetic fibres
- » High shape retention
- » High elasticity
- » Extremely high color and water capacity
- » Matte black brush handle
- » Handcrafted in Germany
